Dear [Redacted]

STAT

Attached is my suggested agenda for a useful late April visit for you at our facility. I think that the subjects are self-explanatory except for number V. This subject will discuss the pros and cons of merging two classified programs. The tour will include our new Near Field Facility which we know is extending the state-of-the-art in the free world and as such, is an extremely interesting facility.

If there are any of your compatriots that would be interested in such subjects, we would be more than happy to welcome them with you.

It would be useful if a rather broad range of clearances could be submitted for your visit.

I hope you are feeling better from your bout with the flu and we can get together in the not-too-distant future.

Sincerely,

MARTIN MARIETTA AEROSPACE

F. D. Selbie, Jr.
